

Photos helped this company improve efficiency and save \$30k per year on labor costs

Industry Vertical - 3PL

The company is a leading distributor of goods to customers. Their main goal was to prove to their customers that they were doing their job right through capturing photos of the whole warehouse operations.

Being a 3PL company they have multiple clients and they made sure to fulfill all their needs. They wanted to have efficiency in the work they do but were still facing claims. They were capturing photos with their mobile phones and uploading them to a PC. Photos would get stored in a different file or go missing. In case of claims they would send photos of their customers but the wrong photo got sent. It took lots of man-hours to retrieve needed photos.

After the implementation of our photo-documentation system, the work became much faster. The company can easily store the data in a single PDF, and keeps the files well organized and streamlines the whole warehouse process. The photos can be retrieved easily when needed. LoadProof has helped the company improve their efficiency and save \$30k per year to labor costs alone.

For a much more detailed in-depth case study, email: puga@smart-gladiator.io

HOW WE DID IT:

- Capture Photos of the warehouse operations
- Helps to retrieve data easily when needed
- Keep the files organized and stored in a secure cloud
- It is faster and more efficient.

"LoadProof lets us be able to do it more efficiently, quickly and keep it organized and stored. We saved approximately \$30,000 per year on the labor costs alone".

Chris Theil – Vice President Operations.
